COUNTY POPULATION ESTIMATES
BY
AGE, SEX, AND RACE

July 1, 1979

These estimates should only be used for statistical purposes as applied to Health Planning Data.

NOTE: These age, sex, and race levels were developed using the Provisional July 1, 1979 Population Estimates released by the Department of Labor and Industry, August 1980. The age, sex, and race levels contained in this report are not official estimates and are intended for health planners to be used only for statistical purposes in projecting ranges of "need" by age, sex, and race characteristics.

NOTICE OF DATA AND METHOD
POPULATION ESTIMATES BY AGE, SEX, AND RACE

The age, sex, and race estimates printed in this report were developed for Health Planning Purposes. While the estimates are considered crude, they represent the only age, sex, and race data available for July 1, 1979. These estimates were generated, using as county controls, the Department of Labor and Industry, "Official State July 1 Population Estimates."¹ These age, sex, and race levels are consistent and can be used in conjunction with the Provisional State Estimates.

To generate the age, sex, and race levels, the 1979 "Experimental Population Estimates by Age, Sex, and Race,"² prepared by the Bureau of Census under contract to the National Cancer Institute were used to obtain ratio distribution. The "Proportionate Share Technique" was then used, controlled to the July 1, 1979 population estimates produced by the Department of Labor and Industry.

These crude estimates were generated and are intended for health planners to be used only for statistical purposes in projecting possible ranges of need by age, sex, and race characteristics. Users should be aware that the 1975 base county population level used to generate these data differ in levels from the state and county totals published by the Department of Labor and Industry and should not be used in conjunction with the report, "County Total Resident Estimates." The Bureau of Census in releasing the 1975 age, race, and sex estimates stated that the estimates are "Experimental" in nature and that there are, undoubtedly, counties where substantial errors are involved due to errors and consistencies in the basic data. Copies of the reports used to generate these estimates are available directly from the Department of Labor and Industry, Office of Demographic and Economic Analysis, P.O. Box 845, Trenton, NJ 08625.
